EDUCATION

The Ohio State University, Columbus, Ohio USA — May 2021
Ph.D. in Physics–Advisor: Prof. Amy Connolly
Master of Science in Physics, July 2017

Universidad de Colima, Colima, Mexico. — August 2015
Bachelor of Science in Physics–Advisor: Alfredo Aranda

CURRENT POSITION

Yale University, New Haven, Connecticut USA — **July 2021 –**
Postdoctoral Researcher, Neutrinoless double beta decay.

- Researcher for the CUORE/CUPID experiments.

The Ohio State University, Columbus, OH USA — **Fall 2015 – May 2021**
Ph.D. Student, Ultra-High Energy Neutrino Astrophysics

- Developer of the simulation framework for the Askaryan Radio Array (ARA) collaboration.
- ARA data analysis: contributed to the diffuse search for ultra-high energy neutrinos in four years of data for ARA stations 2 and 3 (published on Phys. Rev. D). Currently leading the efforts on a point source search of ultra-high energy neutrinos using the same dataset as in the diffuse analysis (to be published).
- Actively participated in the construction and realization of the experiment T-576 to detect radio-frequency waves bouncing off particle showers. The experiment was carried out at SLAC National Accelerator Laboratory. This led to two publications in two peer-reviewed journals: Phys. Rev. Letters and Phys. Rev. D.
- Member of the InIceMC simulation group, aimed at improving simulations of radio-based UHE in-ice neutrino experiments.

RESPONSIBILITIES

- ARA operations manager, along with another graduate student. We organize the monitoring schedule for the stations, lead operations calls, help fix issues with the stations when they arise, among other tasks.
- ARA weekly analysis calls organizer and moderator.
- Lead in the simulation-comparison efforts, along with another graduate student. We are in charge of comparing AraSim, the simulation framework used by the ARA collaboration, to other simulations, as well as improving it, and fixing any bugs.
- Mentoring of young graduate students in the group.
